

Tilting Adjustable Stage-

Tilting stage which allows angular adjustment with rotation for component holding

- ✓ Small turned component holding V
- ✓ Available in two sizes.
- ✓ Large size: 150mm diameter and compact 50mm height with rubber ring for smoother action and a larger range of viewing angles.
- ✓ Small size: 80mm diameter and compact 25mm height with little loss of instrument height capacity

We think this little tilting stage is really excellent for presenting smaller components for inspection and digital imaging. We have all tried in vain, to stick parts in modelling clay and the like, in order to present them at the correct angle for inspection. With this gadget, the component can be angled and rotated to suit.

Once used, you really will wonder how you held your components at the correct angle in the past.

Technical Specification

Technical Specification	Large Tilt Table	Small Tilt Table
<i>Diameter</i>	150mm	80mm
<i>Height</i>	50mm	25mm

Standard Components

Product Description	Part Number
<i>Tilt Table Large Assembly</i>	PN30061090
<i>Tilt Table Large Bottom</i>	PN30061091
<i>Tilt Table Large Top</i>	PN30061092
<i>Tilt Table O Ring</i>	PN30061093
<i>Tilt Table Small Assembly</i>	PN30061098
<i>Tilt Table Small Base</i>	PN30061099
<i>Tilt Table Small Top</i>	PN30061100
<i>Tilt Table O Ring</i>	PN30061101
